

MY SUMMER EVENT

STARRING

Benjamin P. Farmington

MAF AIRLINES

NOW DEPARTING
FOR CHICAGO,
ILLINOIS

“Last call for
all passengers
traveling to
Chicago”

Ben!
You're here!

So glad to have you
Ben! It's going to
be a fun summer!

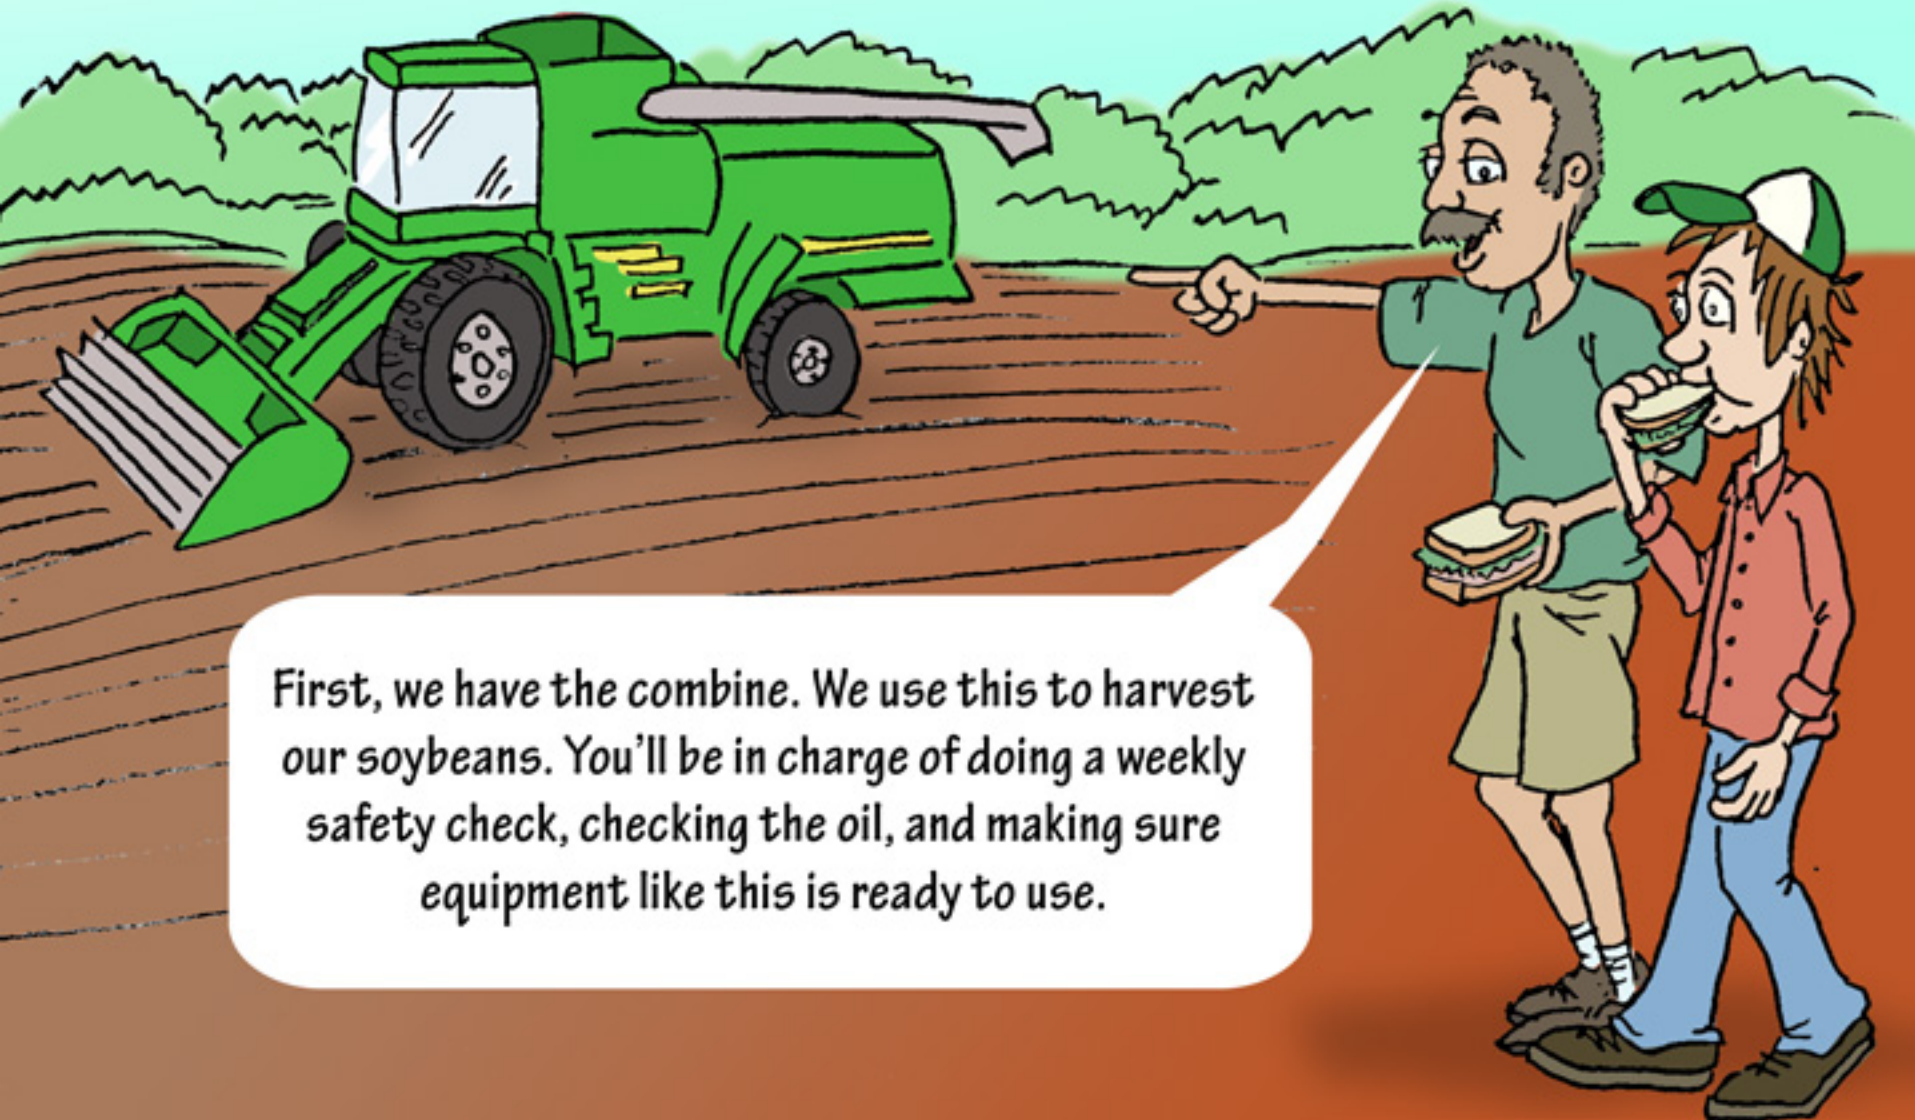

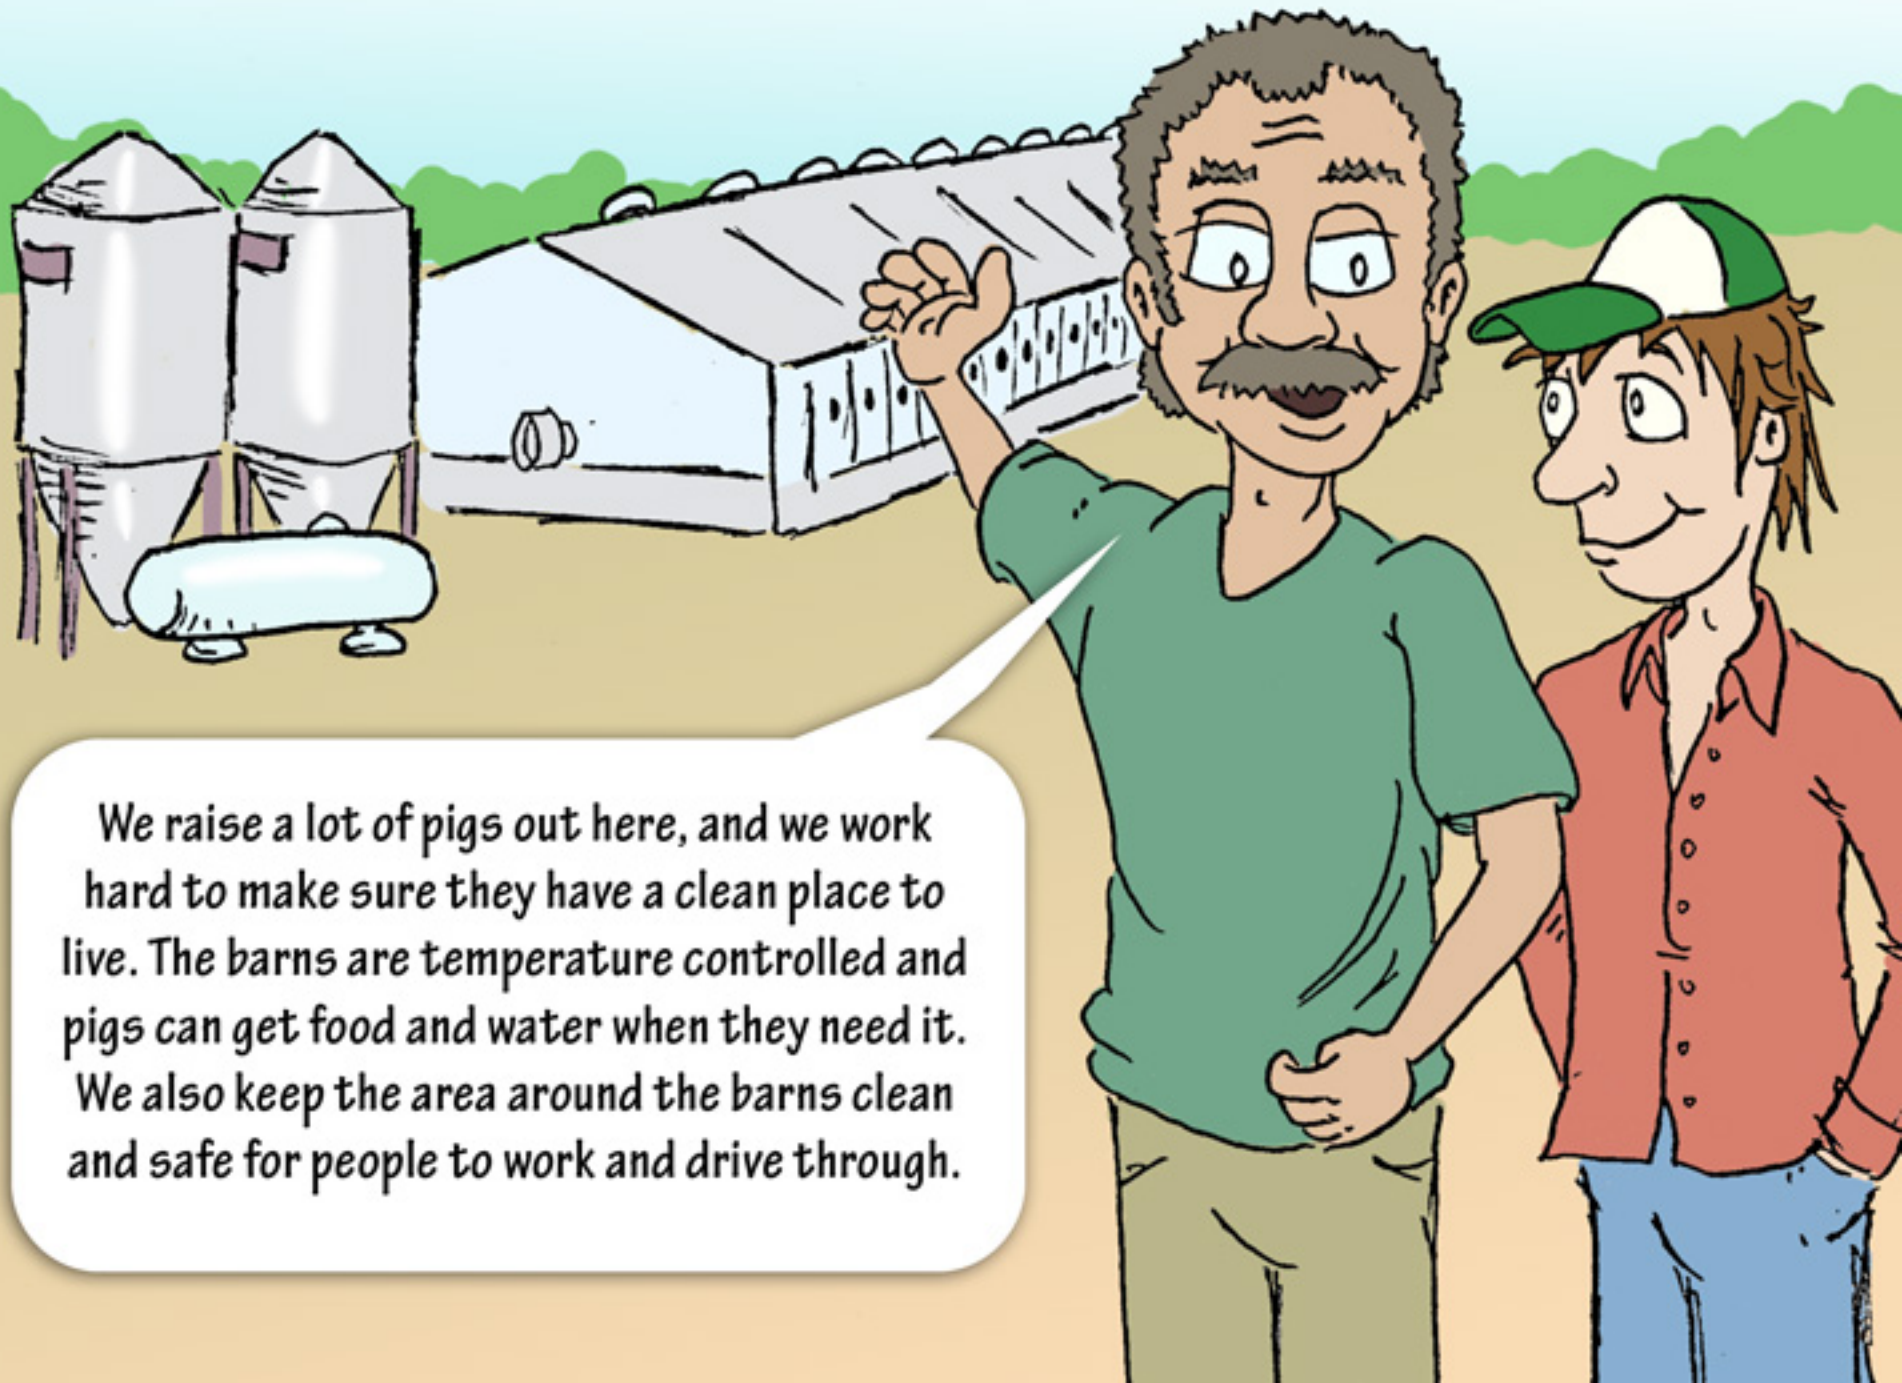

We're going to put you to work while you are here this summer, Ben. It's not every summer we have our nephew around! There is a lot of equipment on the farm that needs to be maintained, and I'm going to teach you how to do it!

Sounds great!

Let's get started.

First, we have the combine. We use this to harvest our soybeans. You'll be in charge of doing a weekly safety check, checking the oil, and making sure equipment like this is ready to use.

We raise a lot of pigs out here, and we work hard to make sure they have a clean place to live. The barns are temperature controlled and pigs can get food and water when they need it. We also keep the area around the barns clean and safe for people to work and drive through.

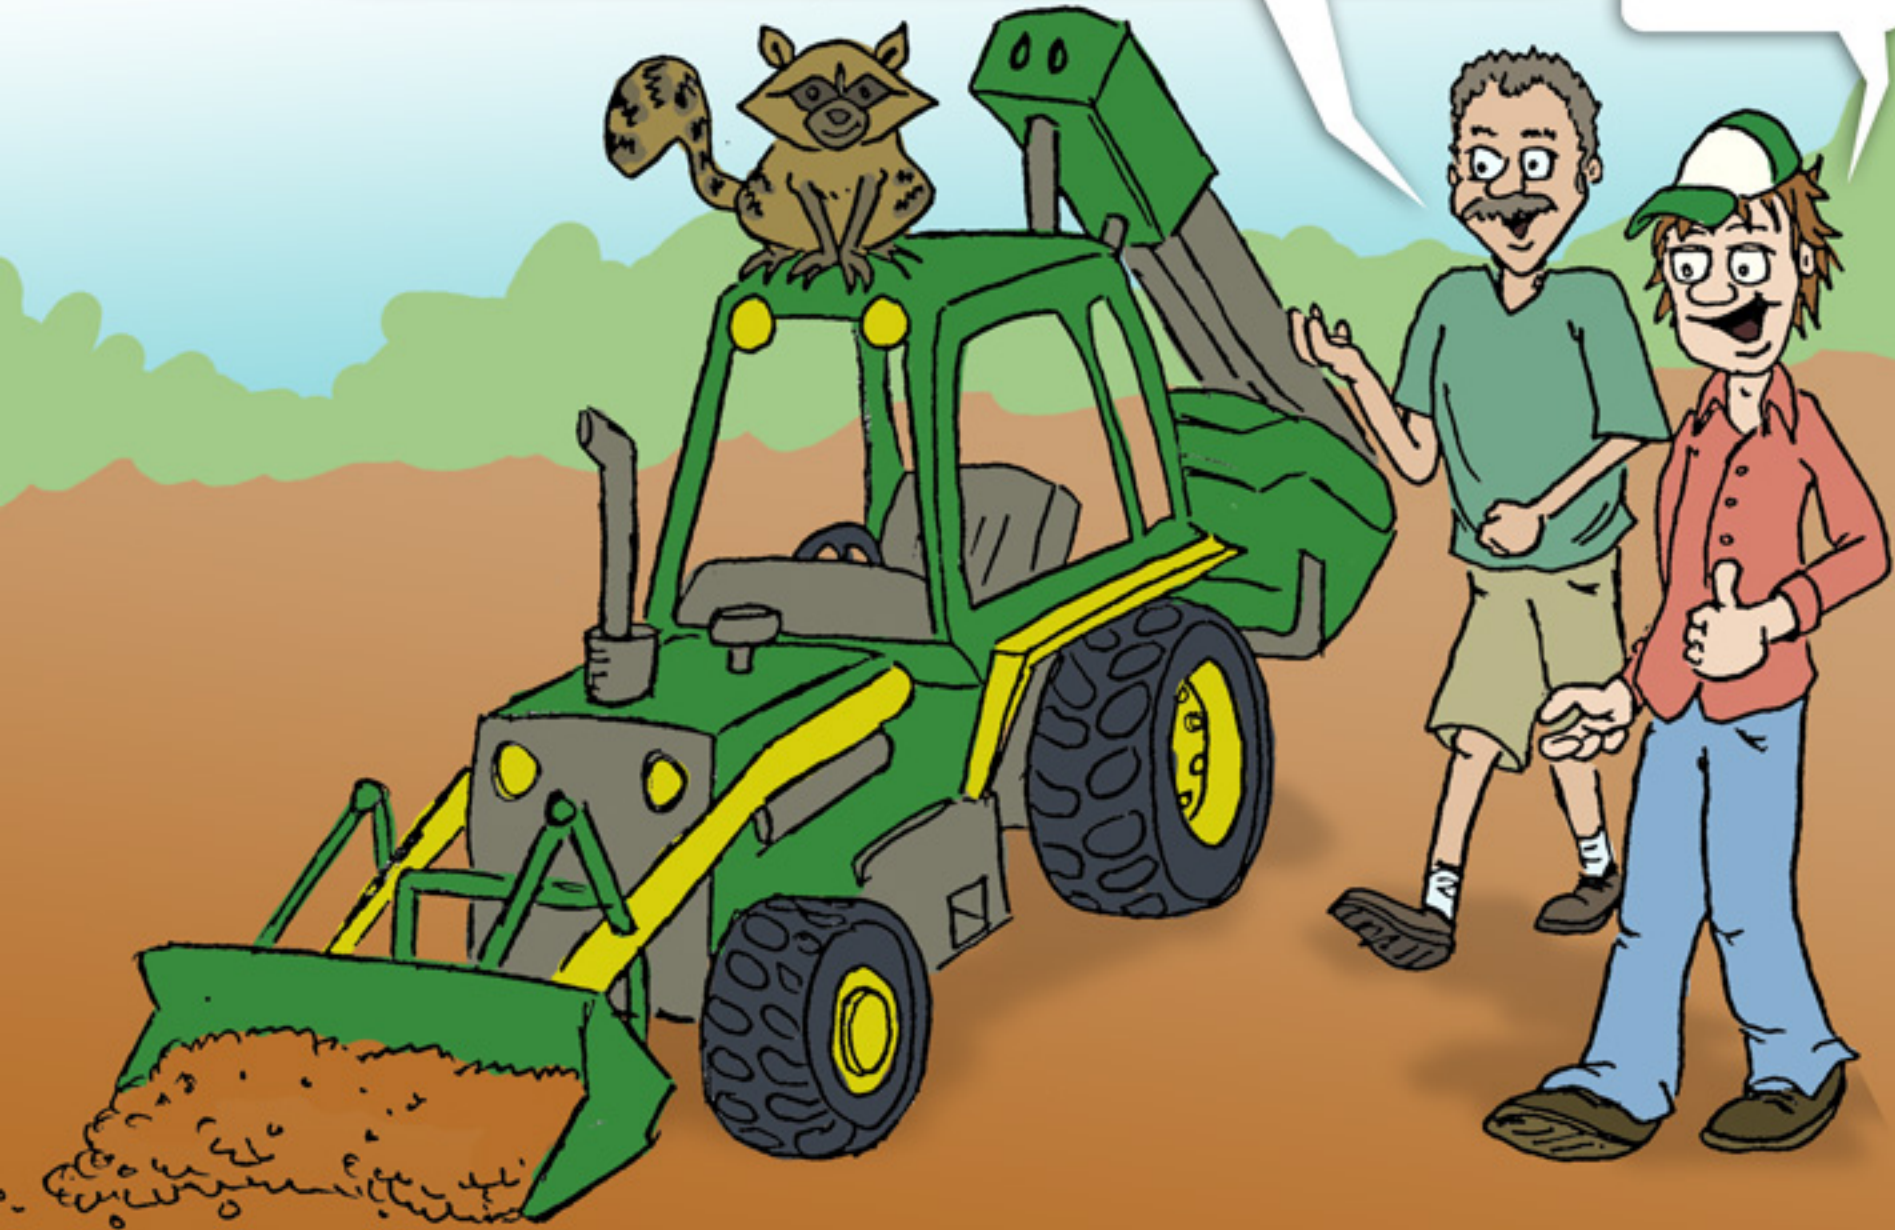

What's
this
for?

This is our new Sub-Compact Utility Tractor. We have different implements we can easily add on to the tractor. We have a mower attachment for cutting fields, a loader for moving dirt and gravel, and even a snowplow to help in the cold winters.

Sometimes we need to dig lines for new pipes or improve water areas where wildlife lives. You'll learn to drive this backhoe soon!

I can't wait!

You'll use this rototiller to help your Aunt till the soil in her garden. Rototillers are handy pieces of equipment used by people in the city and on the farm!

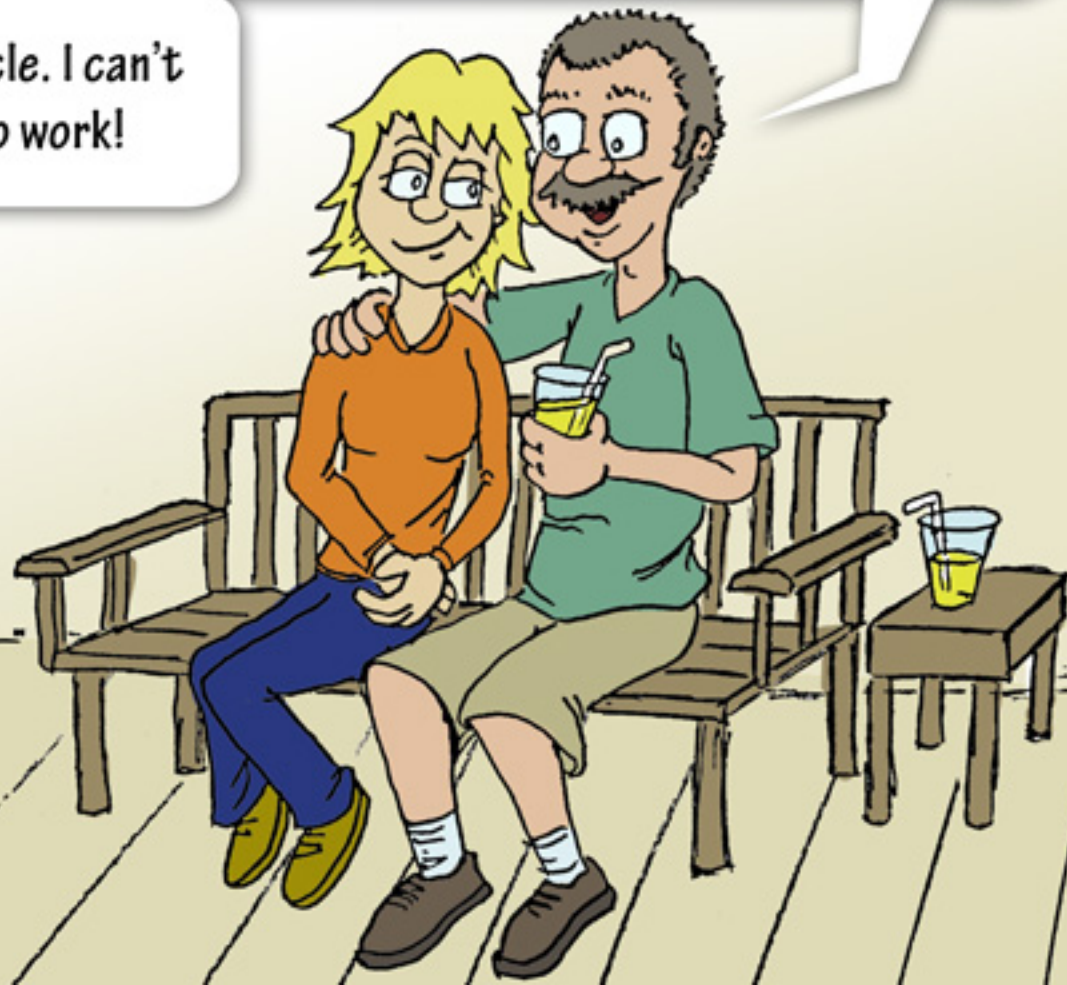

Hello Aunt!

You sure have a lot of equipment around here, Uncle. After looking at all of the machines you need, I can see why farm safety is so important!

It sure is, Ben. Safely operating our equipment helps us provide food for people all around the country and the world! A lot has changed since we started farming, and thanks to new technology we can produce more for others using less time and resources!

That's great Uncle. I can't wait to get to work!

THE END
