

LET'S PLAY...

AND LEARN ABOUT SCIENCE, TECHNOLOGY, ENGINEERING AND MATHEMATICS

Dive into a world of food, fiber and energy that is STEM based and standards-aligned!

What is My American Farm?

My American Farm (www.myamericanfarm.org) is a free educational resource designed to teach youth about agriculture through interactive, fun, learning games. Content level is pre-k through 5th grade, but interest level is pre-k through adult!

How can Teachers use this resource?

My American Farm was designed to make your job easier. Use one of the 19 games to reinforce core content in your classroom. Download the free, offline kiosk program for your in-class computers for purposeful post-work time. Print a "Passport to Sustainability" for your students and watch them grow as they fill up each square. The opportunities are endless. Check out the Educator Resources tab for more information.

How can Families use this Resource?

Bring learning to life at home in a fun family experience. Play a My American Farm game as a family, and reinforce what your child is learning in science, technology, engineering and mathematics. Print an activity sheet for your next road trip, and watch your child grow as they make connections to where their food comes from.

How can I access the games on My American Farm?

- Play games online and access supporting educational resources at myamericanfarm.org
- Download the free, off-line kiosk program on your computer to access all games offline. Click the educator resources tab to find the download link.
- Get the new My American Farm app for tablets in the iTunes store, Google Play, or on Amazon for Kindle Fire.
