

ONE U.S. FARM FEEDS 166 PEOPLE

America's farms and farmers are the world's most productive. Today, each farm produces food and fiber for 166 people annually in the United States and abroad. Of those 166 people, 106 are in the U.S. and 60 are outside the U.S. The global population is expected to increase by 2.2 billion by 2050, which means the world's farmers will have to grow about **70%** more food than what is now produced.

Did You Know?

Total U.S. corn yield (tons per acre) has increased more than 360% since 1950.
